## Nothing Much Happening on 2 m EME

The past weeks and months did not see much DXpedition activity on 144 MHz EME. Only NH6V who successfully started his EME operations from BL20BB was something new to many EME hams on 2 m with BL20 being a much wanted grid square. Rob runs with just 130 watts out to a group of four 13 ele cushcraft yagis remotely controlled and solar powered.

However there is light at the end of the tunnel. Peter KA6U, might resume 2 m operations again this fall. And Emil DL8JJ, will join the Mediterraneo Dx Club's XT2MD DXpedition to Burkina Faso in November. During his off shift periods he will also run EME from IK92FG.
